# SQL Project On PizzaHut Sales
Hello!

*Analyzing PizzaHut Sales with SQL Queries*
Presented by: Anchal Saini
Introduction: I am Anchal Saini, a recent MSc Computer Science graduate with a strong background in data analysis and technological proficiency. My expertise spans cloud computing, data analysis, and developing AI models, particularly in fraud detection systems.

Project Overview: In this project, I applied my SQL expertise to analyze PizzaHut sales data. By formulating and executing precise SQL queries, I was able to address various business questions and extract meaningful insights. The focus was on identifying sales trends, customer behavior, and key performance metrics. This analytical approach provided a deeper understanding of the sales dynamics at PizzaHut, facilitating data-driven decision-making.
